Teletag™ and Platester® working together to make your roads safer.

Teletag™

is a driver safety program that allows drivers to report driving incidents and car owners to receive reported incidents, providing a driving marketplace.

Platester®

is the license plate messaging network, everyone in the United States has the ability to use. Everyone on the road can communicate on a mobile and local networking website (Platester.com) and its mobile site (platester.mobi) by simply using your car's license plate.

Hank Haines commented, "The national audience of the social network offered by Platester® provides their members an easy, effective way of reporting bad or aggressive driving. By coupling the national reporting available through Platester®, and the Signal!™ Member Services of Teletag™ we are making drivers (especially younger drivers) safer through accountability.

Motor vehicle crashes are the leading cause of death for people from 15 to 20 years old. Young drivers account for most accidents and are the largest contributor of fatal accidents for any age group. In 2003, in the United States, 7884 drivers between the ages of 15 to 20-year-old were involved in fatal crashes, and 3657 drivers in this same age group were killed in car crashes.¹

Teletag™

is a privately held company in Tulsa, Oklahoma dedicated to providing programs and services to help families and small fleet owners hold drivers accountable making everyone safer.

Platester®

is a privately held company, Platestar, LLC in Phoenix, AZ. Dedicated to providing a social network as easy to use as knowing someone's license plate.
